

Michael Lee

Full-Stack Software Developer

(714) 504 - 3953 mhykoly@gmail.com [Portfolio](#) [LinkedIn](#) [GitHub](#) San Francisco / Bay Area

Skills JavaScript, React.js, Redux.js, Express.js, Python, Flask, HTML, CSS, Git, PostgreSQL, Sequelize, SQLAlchemy, Socket.io, Microsoft Excel, GNU/Linux

Projects

Lister (JavaScript, React / Redux, Python, Flask, SQLAlchemy, HTML5, CSS3, PostgreSQL)

[Live Site](#) | [Github](#)

Description

- Developed a clean, user-friendly interface that makes it easy for anime fans to perform create, read, update, and delete (CRUD) operations on their own anime lists and reviews for anime, as well as share those lists with others.
- Utilized various web technologies such as HTML, CSS, JavaScript, and Python to design and implement the front-end and back-end functionality.
- Implemented a third-party API to retrieve and display information related to anime, such as title, release date, and synopsis, allowing users to easily find and add anime to their lists.

HangersAcademy (JavaScript, React / Redux, Python, Flask, SocketIO, SQLAlchemy, HTML5, CSS3, PostgreSQL)

[Live Site](#) | [Github](#)

Description

- Developed a fully-featured web-based communication platform with CRUD capability for servers, channels, messages, and friends.
- Utilized SocketIO to implement web sockets for live chat functionality in the messages, providing a seamless and responsive experience for users.

TheBnB (JavaScript, React / Redux, Express.js, Sequelize, HTML5, CSS3, PostgreSQL)

[Live Site](#) | [Github](#)

Description

- Developed a web-based platform for managing spot/listing locations, with full CRUD capabilities for users to create, read, update, and delete their own listings.
- Provided functionality for users to leave reviews for the places they have stayed, and also to view other users' reviews to help make informed booking decisions

Experience

Northwestern Mutual

Financial Planner

Jan 2022 - June 2022

- Led a financial planning practice under Northwestern Mutual providing a comprehensive financial plan for prospective clients.
- Organized client and prospective client finances so they could save time and money, and reduce the amount they pay in taxes.

Anteater Express

Electric Bus Operator

Jul 2019 - Mar 2020

- Demonstrated a strong understanding of electric vehicles and was responsible for the maintenance of the electric bus at the University of California, Irvine.
- Worked independently to diligently carry out smooth operations day to day and provide excellent customer service. Consistently adhered to safety protocols and regulations and maintained a clean driving record.

Sushi Bomb

Restaurant Server

- Worked as a lead server at Sushi Bomb, a high-volume sushi restaurant. Consistently provided excellent customer service and food service to all guests.
- Assisted the management team with training new staff members on best practices for customer service, food handling, and safety protocols.

Education

App Academy

Aug 2022 - Jan 2023

App Academy is an immersive full-stack coding boot camp that offers comprehensive training using JavaScript and React / Redux for the front end and Python and Flask for the back end. With over 1000 hours of instruction, students gain hands-on experience in development by working on real-world projects and receiving mentorship from industry professionals. Graduates are well-prepared and equipped with the skills to continue learning and advancing in their careers.

University of California, Irvine

Sept 2018 - Jun 2022

Bachelor's in Business Economics

Bachelor's in International Studies
